

Top 5 reasons to get a COVID-19 vaccine in 2024

1 It's safe

More than **13 billion doses** of COVID-19 vaccines have been given to people around the world. Researchers have studied the COVID-19 vaccine in people for more than 4 years, and found it to be safe.

2 It's effective

The COVID-19 vaccine lowers your chance of getting very sick or dying from COVID-19. People who **did not get** the COVID-19 vaccine are 3 times more likely to get COVID-19, and 4 times more likely to die from it.

3 It lowers your chance of Long COVID

People who get the COVID-19 vaccine are less likely to get Long COVID. Long COVID is when you still feel sick weeks, months, or years after you had COVID-19.

4 It helps stop the spread

When fewer people get COVID-19, the virus is less able to spread. This lowers your chance of spreading COVID-19 to your loved ones.

5 It's available at no-cost

Most insurance plans cover the cost of the COVID-19 vaccine. No insurance? You can get a no-cost vaccine through the Bridge Access Program until August 2024.
